#### **NOTICE: WARNING CONCERNING COPYRIGHT RESTRICTIONS**

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If the user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

This institution reserves the right to refuse to accept a copying order if, in its judgment, fulfillment of the order would involve violation of copyright law.

**Part One** (Pick either question, but only answer *one* question)

*Question 1*

In what respects are the French, German, and Michigan judicial opinions that were examined early in this course (and to which we returned repeatedly), “artifacts” that reflect the legal systems that produced them?

*Question 2*

What were the origins of the emergence of the law/equity distinction in the English common law and what trade-offs or tensions can you identify in those two sources of law?

**Part Two** (All students must answer this question)

“Legal culture” has been defined as the ideas, attitudes, values, and opinions about law held by people in society.

Identify what you consider to be the central features of legal culture in America today and then what you believe are both the strengths and weaknesses of that outlook.

Feel free to compare and contrast with the legal culture of other societies and communities.
